Love the store, products, everything. ↯Just sometimes hard to get assistance since it is so busy. ↯(I have to flash my credit card while holding a product to draw attention).

↯With what they rake in, the could afford to hire a few more associates and alleviate that. (9/15/2008)

Got much better service at my local CompUSA in Roseville. The Apple employee had much more knowledge and even the CompUSA sales staff had a GREAT Mac guy. (2/2007)

The manager of this store (Spencer) is very friendly and has been extremely helpful every time I've seen him in the store. When the store first opened the employees seemed less than excited about helping customers. The people in the store now seem more upheat and helpful. The store is regularly crowded (there's usually a line at the cash register) and could use expanding. (2/2007)

Arden Fair — / years / Proficiency:

I went to our local Apple Store to purchase a headphone adapter for my new iPhone and noticed that the iMacs at the checkout counter at the back of the store have been turned to face the store for training purposes. All credit card purchases are being handled by employees with the Symbol handheld devices now, with a lone MacBook Pro behind the counter, presumably for cash purchases. The store was crowded and there were literally clumps of customers following the employees around the store trying to make purchases while the employees were trying to explain things to customers who wanted to inquire about purchasing a new computer. This checkout process is really stupid and makes it difficult to make a purchase. I asked the security woman who I should see to check out and she gave me a sympathetic look when she told me I just had to find an available employee. (7/18/2007)

Purchased a computer from a guy named Jermaine, he had no idea what he was talking about in terms of technology. He just kept going and going and I couldn't get a word in. He wouldn't stop until he thought I agreed to buy all this AppleCare, Procure and .mac things. He just kept saying "Trust me you need this" and he made remarks about how I can impress hot chicks or something with the computer and a .mac Web page--I have no idea where he got that from, but it was really strange. Anyway, I ended up just telling the cashier I didn't want any of the extras when Jermaine bolted to the back room. Stay far far away. (2/24/2007)

Went to this store to pick up a new MacBook Pro --what was once a good store with great employees is now run more like a high school. The \$2,500 I brought with me remains in my pocket, I couldn't find a single person to help me the entire time I was there --they were far too busy talking amongst themselves. Nice job Apple - the decline begins I guess. This was my 2nd such experience in one day. We only have one more store to go here in Oregon. I'll try that one today and if I still can't get any help, then I guess I'll just keep my money. (10/20/2008)

Have had MagSafe adapter just over one month and they tell me corrosion is the issue and they don't cover it - and that this is somehow my fault (!?!?) I don't know how corrosion hits in a month, and corrosion itself doesn't cause a shorted power supply - not to mention that this thing sat in a box in a store longer than I had it so whose fault is it? I didn't get to unbox and review the product before I bought it. Reviews on the adapter are abysmal and my feeling is that I got the Used Car Salesman treatment just because they thought they could sell me something else. Adapter sucks, AppleCare sucks, Apple Store sucks. If I wasn't already in so deep for the software I would punt back to 100% Microsoft because of this. (1/4/2008)

Unfortunately the quality of service in Apple Stores has taken a deep downturn in Colorado. When Cherry Creek opened it was like the whole store was a Genius Bar. Now with the massive turnover I have witnessed over the last couple of years you will be lucky to get anyone who knows anything at an Apple store in the Denver area. Poor management and even poorer treatment of employees have contributed to this. (2/2007)

I am suprised reading other reviews on Flatiron Crossing on this website. My experience has always been wonderful. They have some of the top management in the area, which is why I drive the long distance for this store. (I am closer to another Apple store, but come to FC specifically for the service). After using DOS and Windows PCs since 1980 I have finally made the switch to Leopard and the Mac. I bought my wife a MacBook Pro after a horrible experience with 2 new Dell Inspiron notebooks earlier in the year. I recently purchased an iMac for myself. We have been to the Apple Store on Higuera St. in SLO (San Luis Obispo, CA) at least 6 times now. My wife has gone for One2One sessions and I have been to the Genius Bar. We did several workshops together as well. The experience has always been absolutely fantastic. The personnel are friendly, enthusiastic, knowledgeable and extremely helpful. We went to the store in Thousand Oaks but like the SLO store better because of its physical appearance. The store in Thousand Oaks is located in a mall which is being renovated. → We are an hour from SLO and 80-90 mins from Thousand Oaks. Can't wait for the Apple Store in Santa Barbara to open because it will only be 30 mins away. (4/29/2008)

Very, very busy store especially on weekends. Knowledgeable staff and eager to help. One of the first stores to open and the design is showing it's age, as is the wear and tear from the heavy traffic. Badly in need of a modernization. Make a reservation for the Genius Bar and avoid the long waits and lines. This store serves a huge market (6 counties) and is the largest market in the US with only one store. The staff shows the strain of serving such a large market. (2/2007)

International Plaza — male / 55+ years / Proficiency: some

Have shopped at this store for more than a year. Recently, I noticed that I had to actually stop a clerk for help, even though some were available (standing around). I wrote this off to my being a familiar face, but noticed that other customers seemed to be in the same boat. Overall, the attitude of the staff is either very hard-sell, or indifferent; there's not a whole lot of in-between.

Side-note: I detected a certain monitoring of store staff by management, as if the clerks were being timed on how long they spent with a customer without a sale, and were then called away when it appeared the customer wasn't buying that day. In the past, clerks couldn't answer enough questions or devote enough time to each customer's needs, so anxious were they to welcome people to the Apple experience. Rise of The Bean Counters, I imagine, but something I don't particularly like. (10/19/2007)

✓ **International Plaza** — female / 26-39 years / Proficiency: some

I travel frequently and visit this store at least once a month because it's next to the airport. This store has been going downhill for the last year or so and hopefully has hit rock bottom. Apple really needs to step in and change the management of this store. The employees just don't get what Apple stores are supposed to be like. The difference between this store and the Brandon store (30 minutes away) are night and day. I will probably never go back to this store. (10/20/2008)

This last visit was the first time that one of the Apple employees (salespersons) tried to push me and my friend (a soon to be first time Mac user) into buying an iMac. Even though we were interested in the Mac mini and MacBook Pros because of convenience of portability (Macbook Pro) and the small form factor and not being tied to a monitor (Mac mini) were requirements for both of us. She wouldn't let it go and when asked about specs differences between the boxes, she only knew that the Hard Drive in the iMac was bigger and kept talking gigabytes. I have had great experiences at the store and certainly will go back...but I will avoid that sales person at all costs. (12/17/2007)

The store opens at 10am; I got there at 10:30 and the Genius bar was booked for the day. I didn't make an appointment, but there was a slight opening and they were able to get me in and out in about 5 minutes. I was going to purchase Final Cut Express 4, however they only had 4 copies of the upgrade- no full versions. The store was busy compared to the last time I visited it in Mid October. This time there was a small kid section. There was also a roped-off area with 3 cases of iPhones with about 30 in each- same thing with iPods. I was in the store for an hour, and noticed at least 2 iMacs were sold, one with an HP printer which an employee got from the back or side wall of the store...(there was a door in the back but looked like it led up to the front behind a wall). I noticed at least 2 iPhones sold as well. Employees: There were a lot of employees around-about 20 or so, which considering the size of the store and the people in the store was quite sufficient. However, there was only about 1 employee open at a time. They were busy (Dec. 29 Sat.). About 6 people were learning about the Mac platform from a Genius, 4 of them were older couples, 1 or 2 were newbies switching from The Dark Side. Overall: Overall the store had a lot in stock, but they were already booked for the day 1/2 hour after they opened. I know you like details, so this is all I collected from the Whitehall / Lehigh Valley Store. (1/3/2008)

The service in this store on the last 2 occasions I used it was very poor. With no queue at the check-out I still have to wait 10 minutes before I was served, it seems all the staff were busy trying to sell computer to people. As usual in the store it was very difficult to find an employee to make a purchase. There is never anyone at the checkout desk and trying to find a person with a hand held device who was not busy spending ages with another customer was difficult. They should ALWAYS have a check out operating so that you can at least join a queue and know that you will get served eventually instead of continually having to circle the store looking for a free sales person. Staff was amazingly helpful. They went above and beyond to help find a way to help me with my issue. While I never made it to the Genius Bar for my appointment, it was because another member of the staff was kind enough to ask me if he could help me and wound up finding a solution that did not require me to wait until my appointment time. Props to Scott and KP, plus all the other amazing people that work at this store. (2/26/2007)

My husband purchased an 8GB iPhone and three days later realized he needed the 16Gb. By then, every store in our area was out of phones. Meanwhile our 14 day window for upgrade was closing. It was not our fault that the supply chain wasn't working yet no one at corporate or in the stores could/would help. They suggested calling everyday and warned that they could not hold a phone for us. Finally, with two days left, the Natick store said they had the 16 Gb phone. I jumped in the car and arrived within 30 minutes. The sales person asked if the phone was on hold. When I told him I had been repeatedly told that wasn't possible he blushed bright red and mumbled some incoherent lie. He checked in back and came out to tell me all the phones were gone. I was the ONLY customer in the store. When I pressed him about how that was possible he made a raft of ridiculous excuses. It was clear that the sales staff was holding them for friends or other people. We have literally spent thousands of dollars on Apple products in the past few months. Apple seriously needs to upgrade the training of their sales staff and work on turning their stores into places of business and not just a cool place for their employees to hang out. (4/10/2008)

The store is too small. It is always crowded. The elevator is in the back of the store and is a pain to use. I like the way you can purchase an item anywhere in the store and easily checkout with any employee. However you the item should be put in a bag. They said it was okay to leave the store without a bag. That's fine but I am not going to walk around Michigan Ave. with 2 iPod nanos in plain sight (12/13/2007)

The experience was great with the exception of the Genius Bar. I had made an appointment for a creaking MacBook lid (still under warranty). The lid creaks as the machine gets hot. Regent Street — female / 26-39 years / Proficiency: lots

Regent Street suffers because it's too busy and free wi-fi makes it a magnet for every tourist/backpacker/cheapskate salesmen to use. It can be very tough to get onto a Mac to try out a software application or a new Mac. The staff aren't sales people - they're fine putting things through a cash register but that's about it. It's incredibly tough to find out to ask a question of on the shop floor.

The Genius Bars are swamped although it is slightly better now that they're split into Mac/iPod bars. I had a Procure account and even then there were a couple of occasions where I waited more than 45 minutes for a simple exchange.

I've said I wouldn't recommend it but if the Apple Store are the only ones with stock, then I'm going to tell people to go there to buy something. Similarly, if someone is having a problem with a Mac that can't be solved any other way, then again, I'll send them there. But it's so tough to get an appointment, that it would be a last resort. This store was about a half hour on foot from my hotel. This store is incredibly busy, visited while on vacation just to say I could be there, the external architecture is beautiful, definitely a standout storefront, there is no mistaking this store for anything but an Apple store, well lit, clean, organized, but almost impossible to freely demo any of the products. The store is incredibly busy, and a high percentage, subjectively at least 2/3 of the persons occupying display computers were checking personal email and other sites and using the computers for longer than 10 minutes at a stretch. Had a problem with a PowerBook which needed a replacement faceplate. As I live in France the offsite shipping wouldn't have worked with my stay so the Genius registered the problem with AppleCare so I could follow up later. Also agreed earbuds were defective. Told me to bring in proof of purchase for replacement. Earbuds were replaced on another visit, weeks later, when I brought in the box. Another visit when I was shopping for a MacBook Pro an employee cleared surfers off systems and made sure my questions were answered before helping another customer. When I bought the MacBook Pro and needed a business receipt, the employee with EZ Pay made sure that another employee with till access sorted me out. Another visit I was sitting on a bench using my MacBook picking up email and an employee suggested I sit in the theatre as the wireless signal is better there, it's more comfortable and I could plug in my portable. The only minor issue was when my 14yr old was choosing speakers for her iPod and the speakers were mislabeled, however that was quickly sorted. (2/26/2007)

This store seems to be let down by common UK flaws. No staff seem to be cleaning the store while it is open and any that I did see were not well presented (in the Fifth Avenue they are constantly cleaning and in nice white uniforms). I saw countless employees looking for managers to do simple tasks, which apparently require their approval. I was casually walking around and i heard murmurs of disappointment with the management from employees on the shop floor. My friend had a problem with the service in the store (when it came to getting an iPod replaced) and I checked with other employees to find out where these managers had previously worked and most of them are from HMV (makes perfect sense since HMV has some of the worst customer service in the UK). Southlake Town Square — male / 40-54 years / Proficiency: some

Lets see what sort of space you allow here, if it has enough room for a true discription of the experience of south lake. Because after all, Apple is part of a bigger planet true?

This mall came about as side stepping DFW traffic pattern that was shattering the local strip mall. it is a lovely enough newer property, and I imagine they have in mind a narrow railine people mover and loosing the cars in the future, or the design team is light years ahead of ultra stupid, into parallel universe doink. Don't worry, it will get that same lovely patina of all older properties. Ever been down town Denver, flag ship Virgin store? That is the very least in floor space and ceiling height I would make a call on for my baby. And that is what apple is, their baby, and they let the baby down with the low budget calls they made at Southlake, or it ain't done yet. Felt like Hong Kong low budget scarcity a few times. just a few less fingerprints.

I've been perfectly happy with the cyberspace experience, (first apple, first computer, probably some marketing influence?) use it for making prints, online purchases with this machine, but after dragging my wife over to this place, Hey, it come off like an arcade. Kid who greeted us was nice enough, but you could tell he was just as thrilled and relaxed as my lovely bride. I was happy enough with the whole day. My wife on the other hand, her buzz started to kill at the freeway exit, I've since got from her a better answer as to why she was not enjoying herself. Her take was some sort of social dynamic was in play, a dichotomy with her getting the short end, some inner chamber of her very core and heart being stabbed a thousand times. some personal preferences in play here. I doubt if it was imagined, and I doubt if it was real. Probably just multiple

SouthPark — male / 26-39 years / Proficiency: Genius!

I've been in many Apple stores and the Charlotte SouthPark store continues to impress. The employees are very attentive and general work hard to understand the consumers needs without being pushy or snobby (which I have seen in the Soho & 5th Ave locations). I would rather shop in the smaller Charlotte store than go to the flagship stores. I'm in New York city every week and rarely visit the stores there due to the lack of help that I get. (2/2007)

St. Johns Town Center — male / 40-54 years / Proficiency: Genius!

Every time I go in there, the sales people were all congregated in the back gossiping with the manager (Amy I think her name is) about last night's TV shows. I've even heard her tell some very off-color jokes to her employees while customers (some with kids) were within earshot. When it is very obvious that customers are in need of assistance, the manager just turns her back and keeps gossiping and telling jokes. When customers register their complaints she gives the illusion of interest by writing down their complaints and then as soon as the customer is gone, she wads up the paper and then does a basketball 3-pointer shot into the trashcan. I would rate the Genius Bar excellent if it weren't for the head genius (Steve M). The head genius doesn't have a clue about what is going on with his own team. He doesn't have any idea how computers even work. I wish I could say I'm making this up or exaggerating but I'm not. He is also quite rude to customers who don't deserve it every time I see him at the bar. I heard him tell different customers that they can buy a mighty mouse for their Mac Performa!! The other geniuses actually have a clue and end up following up behind him to correct his misinformation... if they aren't too busy with other customers on an understaffed bar. I'm a frequent visitor to this store so I can say that all this is very common at the St Johns Town Center Apple Store and not isolated events. (2/2007)

St. Johns Town Center — male / 26-39 years / Proficiency: Genius!

The Lead Genius Steve Markwith was a total idiot. He had no idea that the Software Update requires the Internet to run properly. He had to ask his co-workers where to find the network preference panel! He didn't know how to lock an iPod so accidental contact with the scroll wheel wouldn't turn it on after it was turned off. That man has no business as a computer tech of any level much less being in the position of LEAD GENIUS. I wouldn't trust him to turn on a light switch much less work on my computer ever again! My friend and I both had laptop problems but we ended up teaching him about the computer rather than the other way around. This guy must have been hired as a charity case. How he earned the title "Mac Genius" is a mystery. The OTHER geniuses I've seen there are very friendly and very tech savvy! There were some really great geniuses who worked there but I haven't seen them around lately. Those geniuses should be rewarded for their hard work and ability! I hope Apple pays them well. Having been to this Apple store on an almost regular basis, I've seen some of the comments on here hold true, but not all. The Genius Bar is understaffed during busy hours, and the lead Genius (Steve M) is incompetent. All the other geniuses are knowledgeable, friendly, and very helpful. The manager (Amy), I found to also be helpful and friendly, and as I witnessed her dealing with a rather hostile customer, handled it professionally and calmly. In any of the times I've been to the store, she's never acted as one of the surveys here depicts. But they do need to get the Genius Bar better staffed, and get Steve demoted. (4/23/2007)

A very laid back store even when very busy at Christmas time, the store is an extra wide format, there is a ton of space in the center of the store devoted to row upon row of ipods, speakers and other accessories, there are numerous demo computers, enough that even with 2 dozen Internet leechers taking up space, there are still more free display models than at the King of russia store, which is only a 20 minute drive away. Purchased two MacPros (08/07), which were represented as having iLife '08 installed ... one of the MacPros did not have iLife'08; it was sold to me with iLife '06, which was discovered by a store employee. Together, we pointed this out to the store's asst mgr, a Ryan McNally who readily admitted that the company had put a number of MacPros in the pipeline without iLife '08 installed, but they decided to sell them as if they did anyway ... he said they tried to cover for this fudging by throwing an iLfe '08 into the shipping boxes, so he said I should go home and recheck the box to see if it contained the '08 disc. I emphasized no such disc was in the box. I demanded he take an '08 version from his for sale shelves & install it right there. He refused, saying he'd give me a break by giving me a website address where I could order '08 through the mails and he'd pick up the postage. I couldn't believe how poorly this employee was performing -- never did he ever express any concern, extend an apology, or offer to install one of his for sale '08 discs right there. He said doing so was an unreasonable request that would cause inventory problems. We all know Ron Johnson is pressing the employe-quality envelop through rapid growth, but this fellow was a study in disinterested arrogance: he had zero concern for the value of my time. (9/2/2007)

The store is in an EXTREMELY congested area. For that reason only, I don't go to this store as often as I'd like. I would not go to this store if there were an alternative in the area. (2/2007)

This store used to be awesome seems to have changed over the last few months it is a mini store and that is horrible!!!! Uncomfortable....unhappy. (7/30/2007)

I visited this store on July 25th, to buy an iPod nano as a present. The floor manager that worked with me was rude and unprofessional. When I asked to see another cover for iPod, he left but never returned. Instead, I found him 15 minutes later speaking with another customer. When I asked him what was going on, he told that because he is a manager, he had been asked to help that person first. I don't understand why one customer is more important than other. Was it because he could clearly see that English was not my first language? At least he could send somebody else to help me. I will think twice before buying from the store chain were immigrants are treated as second-class customers. (8/2/2008)

The majority of employees in the store, save the genius staff, were assholes. I wanted to spend money in their store but they kept pawning me off on each other. (11/27/2007)

The store is good, not great, but good. Employees (working the floor) are too often simply not very bright and miss MANY sales opportunities simply from lack of knowledge when answering questions or from lack of ambition. Software selection is poor. Genius bar is pathetic. Nobody who has purchased a \$2k computer should have to "schedule" an appointment because a genius is showing someone how to use a \$79 iPod. (2/2007)

VERY poor use of Genius Bar. I have used the bar 3x and each time people are stacked up waiting like fish in a market. Nobody should spend \$2,500 on a computer and when they have a problem be told they have to make an APPOINTMENT to see a desk clerk UNLESS of course you want to spend another \$100 to be bumped to the head of the line. After waiting a day to make an appointment, because I refused the \$100 extortion request, I was lucky enough to wait 35 minutes past my scheduled appointment time because some counter clerk was making sure a \$59 dollar ipod was understood by an obviously less than bright owner. Yep, keep the customer who spent \$59 happy while you tick off the one who dropped \$2,500+ this month alone. (2/26/2007)

I went during my lunch break and showed up 5 minutes before my appointment. I waited over a half hour before having to leave for work again, and I had to literally leave my computer for them with almost no time to discuss my issue, and I barely got them to acknowledge that I was leaving it for them to fix. My name was still not up, so they had to make someone else wait longer because I was so delayed. On an earlier visit, I only had to wait about 10 minutes past my appointment time, and had a somewhat better experience but leaving my computer that time for repair took about 25 minutes of answering question after question and it could have been a smoother or faster experience. These visits were both in November. (2/19/2007)

Everyone is welcoming at the store. I've seen employees bend over backwards to help people out. Without a doubt, Saturday afternoons are crazy but the salespeople seem to do pretty well multi-tasking. (2/2007)

When the store is busy, someone should be in charge of directing customers where to go ... because lines form everywhere even at the un-manned cashwrap ... (2/2007)

West Town Mall — male / 18-25 years / Proficiency: Genius!

Store had about 30 shoppers (the busiest store in the mall, most likely) and about 15 apple employees. There was at least 5 employees open for questions and personal shopping. Plenty of iphones and at least 4 of everything to play with. (8/2/2007)

The Genius Bar technician juggled me with two other customers. While I can appreciate the effort to help as many people as possible, I felt ignored. The entire reason for making an appointment, in my opinion, is to receive the technician's undivided attention and help. I received neither during my visit. (10/29/2007)

I have purchased 2 Macs and four 4 iPods over the past eighteen months from this store. Their service is perhaps the reason I continue to come back rather than shop online. I have also shopped at the Cambridge Mass store and found them to be as good. (10/29/2007)

I am choosing to review only this store because it has a track record of poor employers. It is an old store, so it has a very out of date style, but it's like using way back machine, so that's not a problem. Alas, the employees at this store are not as helpful as the rest in DFW and when you do snag one they are not very knowledgeable about the products as one of my IT friends found out with me on a trip there. THE giant projector in the is cool, but if they are not streaming Steve Jobs keynotes anymore, it is kind of pointless. If you are in DFW, go to Southlake, they are easily the best in the area. I bought some Shure headphones for my iPod and it was a great experience. I also bought a cassette adapter for my car because my old one is giving up the ghost. Upon trying the new one, it continually made my car's tape deck flip to side 2 (which it won't work on). It sounded like mud so I took it back within 10 minutes of trying it out. The store staff gladly took my return and tried to offer an alternative solution for me. I told her that I'd probably just stick with what brand I currently have and source a replacement. A pleasurable experience. (2/28/2007)

Went to get brother's iPod fixed and their database had his iPod registered under someone else's name. They then acted as if I stole it. I called my brother into the store to verify. They then refused to do anything about the iPod when we showed them the receipt because it was purchased at Best Buy...at which point I told them it was their database that was in error, not my brother or I. If their database is screwed up, it is not my responsibility to fix it and they are obligated to repair the iPod. I asked to speak to the manager and when she came out she told us she would do nothing about it, that we had to go to Best Buy to take care of the problem. But because their database was screwed up, when we went to Best Buy to resolve the issue, they sent the iPod back saying that it was not registered to my brother. Fuck you Apple Grand Rapids! Yorkdale — male / 26-39 years / Proficiency: lots

They need a larger store. You're often packed in like sardines the Yorkdale store. I'm sure they lose a ton of business because some people will not enter such a busy store. The store in Buffalo is almost twice the size and I've never seen it as busy. (2/2007)

Small store - very busy and very cramped. Hard to find help and long waits to pay for purchases. Considering how far it is from downtown Toronto, I won't be heading there again. (2/21/2007)

Yes. Travelling from London Ontario to Toronto Ontario just to go to an Apple Store is a little far....but the service was great...computers were very busy took a while to get one...genius bar was very helpful (took my broken shuffle in...like 4 minutes latter i walked out with a new one) (3/4/2007)

Yorkdale — male / 26-39 years / Proficiency: some

too small (5/1/2007)

Yorkdale — male / 55+ years / Proficiency: Genius!

Needs to be bigger. Much bigger. Should be a flagship store. At least Toronto should have one.

Overheard a manager discussing the impact the Store has had on the Mall, (one of Canada's finest) and the stores in its immediate vicinity. More shoppers are going in and asking the neighbour stores what is going on in the Apple store. Is there a sale going on, it is so crowded? As a result they are getting increased activity and sales as well. (12/13/2007)
